FOR IMMEDIATE RELEASE

GRIDSTORE TAKES HOME THE GOLD FOR LEADING SCALE-OUT NAS SOLUTION PRESENTED AT TECH AWARDS CIRCLE 2011

Mountain View, Calif. – October 11, 2011 – Gridstore™, the leader in scale-out NAS solutions, today announced that the company has taken Gold for the SMB Software for its Scale-out NAS solution at the Tech Awards Circle presented in New York. Winners were selected by an independent circle of publication reviewers/journalists from nominations based on a broad range of achievements – from product and technology innovations to talented executive leadership and engineering innovators.

Tech Awards Circle celebrates the products, services, vendors and individuals making a difference in the industry today. The winners represent a broad range of achievements, from hardware to software to services in consumer/SOHO, SMB, midrange, and enterprise markets. Gold, silver and bronze awards were given out in each category.

Gridstore's Scale-out NAS solution is designed to reduce storage sprawl and eliminates the risk, cost and complexity of traditional silo-based storage. The Gridstore GS-1000 platform is a powerful virtualized storage grid that pools storage resources under a single management console and provides unlimited storage capacity and reliability at a fraction of the cost of traditional storage offerings. Gridstore provides a simple building block approach to storage that allows customers to add capacity as needed without having to over provision storage resources.

“Organizations both large and small are faced with the same challenges of explosive file growth and the complexity of managing multiple islands of storage,” said Kelly Murphy, CEO Gridstore. “Receiving the top storage software award for our Scale-out NAS solution is further validation of our building block approach to storage that offers enterprise-class performance, reliability and scalability – at an affordable price for any organization.”

About Gridstore

Gridstore is the leader in scale-out Network Attached Storage (NAS) products. The Gridstore Scale-out NAS solution uniquely combines virtualization with a grid processing platform to deliver a single pool of storage that simplifies management while increasing performance, scaling and reliability. The Gridstore system is designed for organizations who struggle with the risk, cost and complexity of storage sprawl and who need enterprise class storage without the cost and complexity. Founded in 2007, Gridstore is headquartered in Mountain View, Calif. and has development facilities in Dublin, Ireland. For more information, please visit: <http://www.gridstore.com>
